REVISION OF BNQ DOCUMENTS

Collaboration from BNQ document users is essential in keeping our documents up to date. Therefore, any suggestion aimed at improving their contents will be appreciated. We ask you to send us your suggestions or comments on the form at the end of this document.

FIRST ENGLISH EDITION — 2016-09-12

This document is published in both French and English. In case of incompatibility, the French version prevails.

This English translation is based on the fourth edition of the original French document.

The systematic review of this document to determine if it has to be modified, revised, reaffirmed or withdrawn will be initiated no later than 2022.

The electronic or printed version of this document is for personal use only. Distribution to third parties, partners or clients, as well as saving, distribution or use on a computer network is forbidden without written agreement from the BNQ.

Only purchasers duly registered with BNQ Customer Service will receive document updates. Notifications and the catalogue may be consulted at all times on the BNQ Web site [www.bnq.qc.ca] to verify if a more recent version of a document exists or if amendments or errata have been published.

If a registered purchaser wishes to continue to receive updates, the purchaser must inform BNQ Customer Service of any change of address as soon as possible.

NOTICE

UNDERSTANDING OF THE NOTION OF EDITION

It is important to note that this edition implicitly includes all amendments and errata that might be published separately at a later date. It is the responsibility of the users of this document to verify whether any amendments or errata exist.

INTERPRETATION

The verb **shall** is used to express a requirement (mandatory) in order to comply with this document.

The verb **should**, or the equivalent expressions **it is recommended that** and **ought to**, is used to indicate a useful, but not mandatory, suggestion or to indicate the most appropriate means of complying with this document.

Except for notes presented as **normative notes**, which set out mandatory requirements and which appear in the lower portion of figures and tables only, all other **notes** are **informative** (non-mandatory) and provide useful information intended to facilitate understanding or clarify the intent of a requirement or to add clarification or further details.

Normative annexes provide additional requirements (mandatory) in order to comply with this document.

Informative annexes provide additional (non-mandatory) information intended to assist in the understanding or use of elements of this document or to clarify its implementation. They contain no mandatory requirements for the purposes of compliance with this document.

DISCLAIMER OF RESPONSIBILITY

This document was developed as a reference document for voluntary use. It is the user's responsibility to verify whether the application of this document is mandatory under the applicable legislation or regulations or whether trade regulations or market conditions stipulate its use in, for example, technical regulations, inspection plans originating from regulatory authorities and certification programs. It is also the responsibility of the users to consider limitations and restrictions specified in the Purpose and Scope and to judge the suitability of this document for the user's purposes.

MARKING AND LABELLING REQUIREMENTS

This document may contain requirements for marking and/or labelling. In this event, in addition to meeting such requirements, it is also the responsibility of the suppliers of products to comply with the applicable national, provincial or territorial laws and regulations of the jurisdictions in which the products are distributed.

FOREWORD

This document was prepared by a Standards Development Committee, whose members were:

BEAUMIER, David	Groupe CTT (Sageos)
BERNARD, France	Association des ingénieurs municipaux du Québec (AIMQ)
BOUVET, Claude	André Bouvet ltée
COUILLARD, Claude	Ville de Québec — Service de l'ingénierie
GINGRAS, Jean	Corporation des officiers municipaux et en environnement du Québec (COMBEQ)
GROEN, Gerry	UPONOR Infra Ltd
LECLAIR, Éric	Centre de technologie minérale et de plasturgie (CTMP)
LEROUX, Serge	IPEX Gestion inc.
MERCIER, Serge	Les produits VersaProfiles
PAILLÉ, Claude	Ville de Trois-Rivières
GAGNÉ, Nicole (Standards Developer)	Bureau de normalisation du Québec (BNQ)

The participation of Tom Kostarides from UPONOR Infra Ltd and Joël Lambert, formerly from the Ville de Trois-Rivières, is also worthy of mention.

POLYETHYLENE (PE) PIPE FOR THE TRANSPORT OF FLUIDS UNDER PRESSURE

1 PURPOSE

This standard specifies the characteristics and test methods relating to solid-wall high-density polyethylene (HDPE) pipe having a hydrostatic design basis greater than or equal to 11 MPa.

NOTE — The designer may apply one or the other of the service coefficients in Table 2 for different working pressures.

2 SCOPE

This standard applies to pipe designated by outside diameters belonging to three dimension ranges: CTS (copper tube size), IPS (iron pipe size) and DIPS (ductile iron pipe size) [see Table 1].

This standard applies to pipe designed for the transport of fluids under pressure, whether or not the fluids are loaded with solid particles. Such pipe is used specifically for raw water, drinking water and wastewater pipelines, for industrial and mining piping and for geothermal needs.

This standard does not apply to pipe intended for the transport and distribution of gas or to pipelines whose working temperature exceeds 60°C.

ATTENTION — Pipe defined in this standard is designed according to nominal pressures established at 23°C (see Table 2). The maximum allowable pressure *MAP* for a pipe component is in function of the temperature *t*, as the figure to the right illustrates. It follows that any mention of *MAP* shall be completed by the mention of the corresponding temperature. The thermal factors to use when calculating working pressure at temperatures exceeding 23°C shall be subject to a recommendation by the manufacturer.

This document was developed to serve as a reference document for conformity assessment activities of specific products.

NOTE — Conformity assessment is defined as the systematic examination of the extent to which a product fulfils specified requirements.

3 NORMATIVE REFERENCES

The references below (including any amendment or errata) are normative references, and are therefore considered mandatory. They are essential to the understanding and use of this document, and are cited in appropriate places in the text.

NOTE — This document also cites informative references that are of a non-mandatory nature. A list of these references is provided in the appendix.

It should be noted that a dated normative reference refers to that specific edition of the reference, while a non-dated normative reference refers to the latest edition of the reference in question.
